

OPERATIONS GUIDE

Onsite Hackathon Mentoring Guide

Companion material for mentors supporting participant teams

Publisher: Future Digital Safety Institute

Applicable Event: 2026 Youth Cyber Safety Hackathon

Effective Date: August 20, 2026

Audience: Technical mentors and event staff

Mentor Role

This guide is companion material for technical mentors supporting teams at the 2026 Youth Cyber Safety Hackathon.

Mentors must not provide complete solutions. They should help teams apply the threat models created during pre-hackathon training to prototype design.

Review Criteria

Mentors will review problem clarity, data minimization, authentication failure handling, and demonstration readiness.

Interim feedback will be reported to the Future Digital Safety Institute operations desk and will not directly determine the final score.

This mentoring guide is companion material for 03_PreHackathon_Training_Plan.pdf and the event defined in 01_Hackathon_Announcement.pdf.

Demo note: The title, organization, event name, and sentence-level evidence in this file are designed for relationship graph demonstrations.
