

TRAINING PLAN

Pre-Hackathon Security Training Plan

A mandatory preparation course for the main event

Operator: Future Digital Safety Institute

Audience: 2026 Youth Cyber Safety Hackathon teams

Training Date: August 13, 2026

Format: Online practical workshop

Learning Objective

This training is a mandatory prerequisite for teams entering the 2026 Youth Cyber Safety Hackathon.

Future Digital Safety Institute instructors will teach threat modeling, secure authentication design, and data minimization through practical exercises.

Dependency on the Main Event

The threat model produced during training is a required input for the problem statement submitted at the main event.

Only teams that complete the pre-hackathon training may participate in the final hackathon on August 20, 2026.

This training plan is a prerequisite for the event defined in 01_Hackathon_Announcement.pdf.

Demo note: The title, organization, event name, and sentence-level evidence in this file are designed for relationship graph demonstrations.
